Halden Ridge Renewables AS

Material Requisition MR-Collector-GIS-Rev2

120 MW Wind Farm Collector Substation — 33kV GIS Switchgear Package

Tender reference TENDER-2026-417

1. ORDER OF PRECEDENCE

In case of conflict between documents, the following order of precedence applies: this Material Requisition, the technical datasheets, the single line diagrams, and the vendor's general terms.

The supplier shall nominate a project manager as the single point of contact for the contract.

Clarifications raised during the tender period are answered in writing and form part of the tender documents.

Information provided by the purchaser is for tender purposes and remains confidential.

The supplier shall comply with the purchaser's site rules and permit-to-work procedures.

2. SCOPE OF SUPPLY

Clarifications raised during the tender period are answered in writing and form part of the tender documents.

The switchgear lineup comprises 7 bays (1 incomer, 1 bus coupler, 5 feeders) of gas-insulated switchgear.

Information provided by the purchaser is for tender purposes and remains confidential.

The supplier shall comply with the purchaser's site rules and permit-to-work procedures.

3. CODES AND STANDARDS

IEC 60255: Measuring relays and protection equipment.

The equipment shall comply with the latest editions of the following standards.

IEC 62271-1: Common specifications for alternating current switchgear and controlgear.

IEC 62271-200: Metal-enclosed switchgear and controlgear.

4. TECHNICAL REQUIREMENTS

All bays shall be of the same type and arrangement to allow interchangeability.

Rated voltage Ur shall be not less than 36 kV.

Rated short-time withstand current Ik shall be 31.5 kA RMS for a duration of 3 s.

Interlocks shall prevent unsafe operation of switching devices.

Operating handles and indicators shall be accessible from the front of each panel.

Interlocks shall prevent unsafe operation of switching devices.

Main busbars shall be electrolytic copper Cu-ETP rated for 2000 A continuous current.

Enclosure protection shall be IP54 with internal arc classification IAC AFLR.

Operating handles and indicators shall be accessible from the front of each panel.

The switchgear shall be suitable for indoor installation in a prefabricated substation building.

Operating handles and indicators shall be accessible from the front of each panel.

Protection IEDs shall communicate via IEC 61850 Edition 2 with PRP redundancy, with pre-wired RTU marshalling in a central marshalling cabinet.

Equipment shall be rated for a maximum ambient air temperature of +45 °C without derating.

The switchgear shall be suitable for indoor installation in a prefabricated substation building.

All bays shall be of the same type and arrangement to allow interchangeability.

5. DOCUMENTATION

Operation and maintenance manuals shall be provided in English and German.

Document reviews by the purchaser do not relieve the supplier of responsibility for correctness.

Drawings and documents shall be submitted in electronic format for review and approval.

Each document shall carry a title block with document number, revision and approval status.

Document reviews by the purchaser do not relieve the supplier of responsibility for correctness.

Drawings and documents shall be submitted in electronic format for review and approval.

Each document shall carry a title block with document number, revision and approval status.

As-built documentation shall be delivered after commissioning is complete.

6. QUALITY REQUIREMENTS

The supplier shall operate a quality management system certified to ISO 9001.

A quality plan shall be issued for review before manufacturing starts.

Non-conformances shall be reported to the purchaser together with the proposed corrective action.

The purchaser reserves the right to audit the supplier and its sub-suppliers.

7. PACKING AND MARKING

Packing lists shall be attached to each package and sent in advance.

Equipment shall be packed for road transport and outdoor storage at site.

Each package shall be marked with the purchase order number and the destination.

Lifting points and centres of gravity shall be marked on each shipping unit.

8. SITE SERVICES

Site supervision for erection and commissioning shall be offered separately.

The supplier's site staff shall attend the purchaser's safety induction.

Commissioning shall follow a procedure agreed with the purchaser.

Site acceptance tests shall be recorded on agreed test sheets.

9. FACTORY ACCEPTANCE TEST

Type test certificates from an accredited laboratory are submitted with the offer.

A 3-day witnessed integrated factory acceptance test (I-FAT) with primary injection shall be included in the contract price.

Test results are recorded on test sheets signed by the supplier's quality inspector.

Hold points are agreed with the purchaser during the kick-off meeting.

10. COMMERCIAL REQUIREMENTS

Unit prices for additional bays are available on request.

Delivery shall be DDP project site Rogaland (Incoterms 2020).

The defect liability period shall be 24 months from commissioning.

Prices are fixed and firm for the scope described in this offer.

Payment terms: milestone payments as defined in the purchase order.

11. SPARE PARTS

Spare part prices shall remain valid as stated in the commercial terms.

A list of recommended spare parts shall be included with the offer.

Spare parts shall be interchangeable with the corresponding original parts.

Special tools required for maintenance shall be supplied with the equipment.

A list of recommended spare parts shall be included with the offer.

Spare parts shall be interchangeable with the corresponding original parts.

Special tools required for maintenance shall be supplied with the equipment.

Spare part prices shall remain valid as stated in the commercial terms.

12. TRAINING

The training programme shall be agreed with the purchaser before delivery.

Training shall cover operation, maintenance and safety of the switchgear.

Training material shall be provided to each participant.

The training programme shall be agreed with the purchaser before delivery.

Training shall cover operation, maintenance and safety of the switchgear.

Training material shall be provided to each participant.

The training programme shall be agreed with the purchaser before delivery.

Training shall cover operation, maintenance and safety of the switchgear.

13. VENDOR DATA REQUIREMENTS

Document reviews by the purchaser do not relieve the supplier of responsibility for correctness.

Drawings and documents shall be submitted in electronic format for review and approval.

Each document shall carry a title block with document number, revision and approval status.

As-built documentation shall be delivered after commissioning is complete.

Drawings and documents shall be submitted in electronic format for review and approval.

Each document shall carry a title block with document number, revision and approval status.

As-built documentation shall be delivered after commissioning is complete.

Operation and maintenance manuals shall be provided in English and German.

Each document shall carry a title block with document number, revision and approval status.

As-built documentation shall be delivered after commissioning is complete.

Operation and maintenance manuals shall be provided in English and German.

Document reviews by the purchaser do not relieve the supplier of responsibility for correctness.

14. HEALTH, SAFETY AND ENVIRONMENT

Insulating gas handling shall follow the applicable environmental regulations.

Waste packaging shall be removed from site by the supplier.

The supplier shall provide safety data sheets for all hazardous substances.

Insulating gas handling shall follow the applicable environmental regulations.

Waste packaging shall be removed from site by the supplier.

The supplier shall provide safety data sheets for all hazardous substances.

Insulating gas handling shall follow the applicable environmental regulations.

Waste packaging shall be removed from site by the supplier.

15. EVALUATION CRITERIA

Offers are evaluated on technical compliance, commercial terms and total cost of ownership.

Deviations shall be listed by the bidder; deviations not listed are deemed not to exist.

The purchaser may request technical clarification meetings with shortlisted bidders.

Offers are evaluated on technical compliance, commercial terms and total cost of ownership.

Deviations shall be listed by the bidder; deviations not listed are deemed not to exist.

The purchaser may request technical clarification meetings with shortlisted bidders.

Offers are evaluated on technical compliance, commercial terms and total cost of ownership.

Deviations shall be listed by the bidder; deviations not listed are deemed not to exist.

16. ATTACHMENTS

Attachment C: Site layout and access route.

Attachment A: Single line diagram of the substation.

Attachment B: Datasheet templates to be completed by the bidder.

Attachment C: Site layout and access route.
